SUMMARY

Full Stack Engineer with 3+ years of experience building and delivering scalable web applications, including Shopify dropshipping apps. Expertise in database management, real-time systems, and CI/CD processes. Proven track record of managing projects, mentoring developers, and delivering high-performance solutions.

SKILLS

Programming Languages & Paradigms: JavaScript (ES6+), TypeScript, OOP, Functional Programming

Front-end Technologies: Next.js, Redux, Tailwind CSS, Storybook, tRPC

Back-end Technologies: Node.js, Express.js, NestJS

APIs: RESTful APIs, GraphQL, Webhook, Shopify Admin API

Databases & Cloud Services: MongoDB, PostgreSQL, Docker, AWS (S3, Lightsail), Redis, Vercel, GitHub Actions

Tools & Platforms: Prisma, Stripe, Strapi, Shopify App Development, Socket.IO, Sentry, Turborepo

Testing & Quality: Jest, Cypress, ESLint, Prettier, Husky

EXPERIENCE

Corexlab Limited - Mirpur 10, Dhaka, Bangladesh

1st Dec 2021 - Present

Full Stack Engineer

- Led end-to-end development of **USEND**, a high-traffic Shopify dropshipping app, achieving 99.9% uptime by delivering a scalable, robust, and seamless user experience.
- Integrated critical 3rd-party services (Stripe, 17Track) and implemented Redis caching to improve application responsiveness by 30% and ensure real-time data reliability.
- Mentored 3 junior developers, enforced company-wide coding best practices and improved team efficiency, contributing to a 95% on-time project delivery rate
- Optimized backend systems and database management to support high-volume transactions, while improving deployment processes for streamlined production releases.
- Collaborating on **Smaply** (a journey mapping software by More than Metrics GmbH), contributing to product enhancements, feature development, and cross-functional improvements.

Flyte Solutions - Gulshan, Dhaka, Bangladesh

11th July 2021 - December 2021

Frontend Developer

- Constructed responsive, pixel-perfect UIs using Next.js for key client projects, reducing load times by 20% and achieving cross-device consistency.
- Integrated 5+ complex RESTful APIs, optimizing data fetching to reduce API response latency by 20%, enhancing the user experience.
- Collaborated closely with designers and backend developers to implement interactive and user-friendly features, improving overall engagement and reducing load times.

FEATURED PROJECT

StyleVibe - A Full Stack Salon Service App | [Live link](#)

- Engineered StyleVibe app with separate portals for admin, customer, and seller, enabling each user type to manage their profile, services, bookings, and transactions efficiently.
- Integrated Stripe Connect to architect and manage secure, split transactions, including automated application fee deduction and instantaneous seller payouts.
- Executed a booking and notification system queue to handle successful and failed transactions and dispute creation, ensuring real-time updates and notifications for all users.
- Built real-time chat functionality between customers and sellers, enabling seamless communication, instant updates, and improved user engagement within the platform.

Technologies used: Next Js, Redux, RTK Query, Tailwind CSS, Express JS, MongoDB, Redis, Stripe, Socket.IO
